

Checklist of the Birds of Bolivia, Version 10/08/2013.

Species sequence, nomenclature, and taxonomy follow (with very few exceptions) the South American Classification Committee of the American Ornithologists' Union (<http://www.museum.lsu.edu/~Remsen/SACCBaseline.html>).

Status: R = year-round or seasonal breeding resident (known or assumed/expected to breed); VE = non-breeding, migratory austral summer resident; VI = non-breeding, migratory austral winter resident; Ac = species known to occur only accidentally (vagrant) or occasionally in small numbers; E = endemic to Bolivia (highlighted brown); NE = near endemic (> 90% of distributional range in Bolivia; highlighted olive).
